## Running Back Attack!

Pretend you are a running back. Roll the dice. That's how many yards you just gained. Keep track of your total number of yards to see how many you gained in one game. Each game consists of ten rolls per person. Also, you can double the amount of your last roll. Play a friend or family member. To make it harder, roll two or three dice at a time to see how many yards are gained per run.

**For example:**

First Roll = 6

Second Roll = 2

Third Roll = 3

Fourth Roll = 4

Fifth Roll = 6

Sixth Roll = 5

Seventh Roll = 2

Eighth Roll = 5

Ninth Roll = 3

Tenth Roll =  $4 \times 2 = 8$

**Total Yards Gained =  $6 + 2 + 3 + 4 + 6 + 5 + 2 + 5 + 3 + 8 = 44$  yds**
